EuroGuiDerm Guideline for the treatment of Psoriasis vulgaris

- Overview of clinical management for 14 drugs, guidance on how to manage 15 specific clinical situations, DECISION GRID for quick reference, IFPA patient guide:
Part 1: <https://onlinelibrary.wiley.com/doi/full/10.1111/jdv.16915>
Part 2: <https://onlinelibrary.wiley.com/doi/10.1111/jdv.16926>
- **Updates can be found on the new website:** “Living EuroGuiDerm Guideline for the systemic treatment of psoriasis vulgaris”: <https://www.edf.one/home/Guidelines/EuroGuiDerm-psoriasis-vulgaris.html>
- **New Chapter: Vaccination against SARS-CoV-2 in people with psoriasis disease**

Cochrane developed and continuously refines a COVID-19 trial registry. <https://covid-19.cochrane.org>. The register is study-based, which means that all available references to one study are linked to one single entry. This makes it much easier to reviews studies and data.

GUIDELINES WEBPAGE – NEW DESIGN

<https://www.edf.one/home/Guidelines/Guidelines.html> The new design differentiates between document types (e.g. guideline, methods report). You can also see, how often each document is downloaded.

Document type	Year	Download/Link
Guideline	2016	Download 87
Methods Report	2016	Download 2
